

Ancillary Equipment

Hy-Ram offer a comprehensive range of ancillary equipment to accompany piping operations such as Butt and Electro Fusion. Our extensive range includes generators, spill kits, tents, pipe rollers, internal debadders and external debadders. Most items are available for purchase or hire.

Generators

we're available for hire

Designed with the water and gas industries in mind, a range of TIN12 specification generators suitable for use with Butt Fusion machines and Electrofusion boxes is available. 220v output & trolley units also available upon request

Available to hire | Repair & Service Available
