Breathing Apparatus

Nevis Breathing Apparatus

Powered System Turbine

Breathing Apparatus Bag

Hy-Ram is an approved distributor for the Centurion range of breathing apparatus.

The Nevis (negative pressure) unassisted Fresh Air System is a simple respiratory protective system for use in "Confined spaces". The simplicity and ease of use of the system allows operators to work safely in potentially oxygen deficient hazardous areas, breathing air from an uncontaminated source.

The Nevis (positive pressure) assisted Fresh Air System combines all the features of the unassisted system but with the added benefit of having clean air supplied from an uncontaminated source by an electrically driven air moving turbine system.

Classification - EN 138 Class 2, Mask - EN 136, Class 3.

For spare parts or more information, please contact our Sales Office.

Product Code	Description
006-000076	1-person Nevis FABA Kit - full-face mask, protective bag, double air tube, flash hood, waistbelt, 9m breathing hose, strainer & anchor pin, storage box, MEDIUM MASK
006-000117	1-person Nevis FABA Kit - full-face mask, protective bag, double air tube, flash hood, waistbelt, 9m breathing hose, strainer & anchor pin, storage box SMALL MASK
006-000118	1-person Nevis FABA Kit - full-face mask, protective bag, double air tube, flash hood, waistbelt, 9m breathing hose, strainer & anchor pin, storage box LARGE MASK
